

RealPro

digital

imposition workflow for digital presses

A powerful "print ready" PDF and template imposition solution for digital production

Intuitive operation

Single production window and intuitive GUI offers a fast learning curve and allows complex jobs to be easily constructed and managed.

Unattended operation

Job templates and a range of integrated workflow tools enable fully automated job processing via drop folder.

Maximised production efficiency

Late binding PDF architecture offers an adaptive flexible solution allowing imposition changes and edits to be applied late in the workflow.

Client server architecture

Unlimited workflow clients allow production staff to create and manage jobs from their local Mac or PC desktop.

Integrated imposition

Replaces traditional desktop solutions with an in-line, multi-user imposition server, offering reduced cost of ownership and increased Pre-Press productivity and efficiency.

Advanced soft proofing

Approval of job content in both 2D and 3D modes.

RealPro Digital Workflow

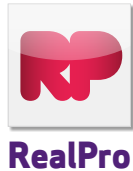

RealPro Digital is a powerful "print ready" PDF and template imposition solution with ICC colour management for leading digital presses. Developed and designed specifically for digital press users who want a fast, modern, upgradable, easy to use, automated production workflow system.

RealPro Digital is a pure PDF workflow which always preserves the original PDF content, and ensures seamless connectivity with leading DFE's (RIPs) supporting all types of digital output devices. Its host of features include pre-flighting, automated imposition, archiving, ICC based colour management, **3D proofing** and much more besides.

RealPro Digital's modular software design makes it affordable and easy to select the right specification for your business needs, but highly scalable as your business grows.

Proven ROI • Fully Scalable • Smart Automation • Fast Learning Curve • Future Proof

digital

Key Features

- Supplies print ready PDF data to digital front ends (DFEs).
- Efficient proprietary JDF database.
- Automated JDF job ticket based processing.
- Single pane production window.
- Integrated imposition server / clients.
- Mac and PC multi user architecture.
- Enfocus Pre-flight and Action list support. (v13.1)
- Adobe® PDF Library. (v15.04)
- Automated job archiving as standard.
- Comprehensive ICC colour management.
- Fast job repurposing.

Import Formats

- PDF, PDF/X1A, PDF/X-3, PDF/X-4, Outline PDF.
- Composite Adobe® Postscript®, EPS.

Export Formats

- PDF, PDF/X1A, PDF/X-3, Stitched PDF.

Supported Platforms

- Server – Windows.
- Client – Windows / Macintosh.
